General Information

Advanced Level and Applied General

Eggbuckland Sixth Form Offers...

Eggbuckland Sixth Form is a successful and supportive place to continue your studies Post 16. A wide range of qualifications are offered at Levels 2 and 3. More information on specific courses can be found in the subject sheets and from Curriculum Team Leaders. The subject sheets are available on our website for parents, carers and students to view at any time.

Level 3:

Advanced Level and Applied General Qualifications

These 2-year qualifications cover many different subjects, all of which have their own entry requirements. Each student must take a range of subjects for 2 years in order to gain appropriate qualifications to progress to University, an apprenticeship or employment. Some careers require students to undertake specific courses. The qualifications needed for specific careers should be researched by students and parents, but information, advice and guidance can be discussed at interview, or by appointment with Mrs Harris in The Lighthouse.

All the courses in this pathway will require students to be able to research, study text and complete extended writing. Students will be expected to complete 4 hours of independent study each week for each course they undertake. Courses are assessed in a variety of ways, depending on exam board specifications. Level 3 Advanced

Level Qualifications (A Levels)

These are academic courses. To complete a full Advanced Level in a particular subject, a student must follow the subject for 2 years.

Level 3 Applied General Qualifications include Cambridge Technicals/ Nationals and BTEC Nationals

These combine an examination with externally assessed coursework and include Cambridge Technicals and BTEC Nationals. These are courses which relate to a broad area of employment e.g. Business, Engineering, Sport, Health and Social Care or Environmental Science.

These qualifications are equivalent to one, or two A Levels and can be taken with other Advanced Level courses.

It is expected that most students studying Level 3 qualifications will opt for 3 subjects.
